NANDINI YAMAGAR

Python Full Stack Developer & AI / Data Specialist

Bengaluru, Karnataka, India • +91 8073835526 • nandiniyamagar5@gmail.com • linkedin.com/in/nandini-yamagar • github.com/NandiniY018 • nandiniy018.github.io/Portfolio

PROFESSIONAL SUMMARY

Results-driven **Full Stack Developer & AI/Data Specialist** with a Bachelor of Engineering in Computer Science (8.3 CGPA). Proficient in developing scalable web applications and microservices using **Python, Django, FastAPI, React.js, and MySQL**, alongside engineering predictive machine learning pipelines with **Scikit-learn, Pandas, and NumPy**. Hands-on experience developing multi-tenant e-commerce platforms, agricultural yield forecasting models, and business intelligence dashboards (Power BI, Excel). Solid grounding in Data Structures, Algorithms, OOP, RESTful architectures, and Agile SDLC methodologies, with a passion for delivering high-impact, data-driven software solutions.

TECHNICAL SKILLS

Programming Languages:	Python (OOP, Concurrency), JavaScript (ES6+), SQL (Query Optimization), C
Frontend Development:	React.js, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive Design, State Management
Backend & APIs:	Django, Django REST Framework, FastAPI, Node.js (Basics), RESTful APIs, JWT Authentication
Machine Learning & Analytics:	Scikit-learn, Pandas, NumPy, XGBoost, Regression & Ensemble Models, EDA, Feature Engineering
Business Intelligence:	Power BI (DAX, Power Query, KPIs, Dashboards), Advanced Excel (VLOOKUP, Pivot Tables), IBM SPSS
Databases & Storage:	MySQL, PostgreSQL, MongoDB, SQLite (Relational Modeling, Indexing, ACID Transactions)
Tools & Methodologies:	Git, GitHub, Docker, Postman, Linux/Bash, VS Code, Agile/Scrum, CI/CD Pipelines, SDLC

PROFESSIONAL & INTERNSHIP EXPERIENCE

Software Developer Intern – eDeal India, Chikodi, India — **Mar 2026 – Jun 2026**

Stack: React.js, Next.js, Tailwind CSS, REST APIs, Git, Agile

- Architected and implemented responsive, accessible UI modules using **React.js, Next.js, and Tailwind CSS**, reducing initial page load latency and improving cross-device engagement.
- Integrated secure **RESTful API endpoints** for core transactional workflows, including dynamic catalog search, filtering, shopping cart state persistence, checkout, and order lifecycle tracking.
- Built dynamic user dashboards with client-side state management for real-time customer profiles, wishlist items, and inventory status updates.
- Participated actively in agile sprint ceremonies, conducting rigorous code reviews, debugging UI/integration bottlenecks, and maintaining clean version control via Git & GitHub.

Frontend Developer – Travel With Pravah, Remote — **Jan 2026 – Feb 2026**

Stack: JavaScript (ES6+), React.js, Bootstrap, HTML5/CSS3, Git

- Engineered a responsive luxury travel portal using modern **JavaScript (ES6+) and React.js**, crafting fluid navigation flows, interactive destination galleries, and booking inquiry interfaces.
- Accelerated asset delivery and page performance by **25%** through image compression, code splitting, lazy loading, and semantic HTML5 layout structures.
- Ensured comprehensive cross-browser and cross-device consistency across mobile, tablet, and desktop viewports, enhancing core web vitals and overall user retention.

KEY PROJECTS

Crop Yield Prediction Platform — **Nov 2024 – Apr 2025**

Tech: Python, Scikit-learn, XGBoost, Pandas, NumPy, Flask, Matplotlib, SQLite

- Developed an end-to-end Machine Learning pipeline predicting crop productivity from environmental, soil, rainfall, and temperature indicators across multiple crop classifications.
- Conducted comprehensive **exploratory data analysis (EDA), data imputation, and feature engineering** on agricultural datasets exceeding 1,000+ observation points.
- Trained, tuned, and evaluated regression and ensemble architectures (Random Forest, Decision Tree, Linear Regression, and XGBoost), identifying the highest accuracy predictive model with minimized RMSE.
- Deployed an interactive **Flask web dashboard** enabling farmers and agronomists to input localized parameters and receive instant yield forecasts.

Multi-Vendor E-Commerce Platform — **Completed 2026**

Tech: React.js, Next.js, REST APIs, MongoDB, Tailwind CSS, JavaScript

- Engineered a scalable multi-tenant marketplace platform with segregated administration and vendor management portals for catalog management, stock monitoring, and sales reporting.
- Implemented secure tokenized checkout flows, persistent cart state management, and real-time order tracking via modular REST API integration.
- Designed performant UI with sub-second route transitions, dynamic faceted search, and interactive customer rewards programs.

Grocery Management System — **Nov 2023 – Feb 2024**

Tech: PHP, MySQL, JavaScript, Bootstrap, Apache, HTML5, CSS3

- Architected a retail inventory management application featuring a **normalized relational schema (6 core tables)** with ACID-compliant transaction handling for accurate inventory auditing.
- Automated real-time low-stock alerts, point-of-sale billing, sales categorization, and instant PDF receipt generation for 100+ product SKUs.

CERTIFICATIONS

Python Full Stack Web Development — Jun 2025 – Dec 2025
SkyllX Software Training Institute, Bangalore

AI & ML Specialization — Jun 2024 – Nov 2024
Rooman Technology & IBM

IBM SPSS Statistics & Analytics — Aug 2026
Imra Tech Academy

Power BI for Data Analytics — Sep 2026
Simplilearn

EDUCATION

Bachelor of Engineering (B.E.) – Computer Science & Engineering	Hira Sugar Institute of Technology, Belagavi	**CGPA: 8.3 | 2021–25**
Pre-University Course (PUC) – Science (PCMB)	C.L.E PU College, Chikodi	**77% | 2019–21**
Secondary School Leaving Certificate (SSLC – 10th)	C.K. High School, Examba	**84% | 2018–19**
